

TFL ANTI-SOILING

# Easy care of upholstery in pastel shades

»» Leather for a lifetime

TFL – Great chemicals. Excellent advice.

TFL ANTI-SOILING

## Less staining – improved cleanability

### Easy care of your upholstery

As illustrated in the TFL Colour Trends catalogue Spring-Summer 2020 (theme “Gothic Age”), home furnitures in light pastel colours like vanille, peach and wheat shades are very popular nowadays. As much pastel shades create an inviting and clean atmosphere in your living room as much light coloured home furnitures are exposed to yellowing and soiling.

### How to make your leather seats look good, for longer?

A careful selection of finishing products help to protect the film layer to turn yellow caused by intense UV radiation and, a smooth surface morphology avoids soil and dirt to be deposited in the top layer.

→ **It's all about anti-aging and surface morphology**

### Full Grain Nappa with natural appearance

→ Upgrading:

RODA® Care NL

→ Base coat:
